Louisville Democrat.

SATURDAY.....JAN. 31, 1857.

Local Affairs.

Belligious Notices.

Among the extraordinary features of the Sunday Democrat will be its religious intelligence. Contrary to our custom heretofore, we will publish notices of a religious character—such as appointments to preach, to deliver moral lectures, &c., on the Sabbath—free of charge. Indeed, we will be thankful to our friends of the different churches, if they will favor us with that description of information.

THE SUNDAY DEMOCRAT.—The publication of the regular edition of the Democrat for Sunday will be commenced to-morrow. It will contain a unusual variety of reading matter—much that is adapted to Sabbath, the latest news, general miscellany, local sketches of interest, and local news, to the hour of going to press.

Advertisers should bear in mind that the Democrat will have an extraordinary circulation on Sunday—supplying, as it will, the place of all the regular city dailies on that day—that consideration will make it unrivaled as an advertising medium.

THE RIVER BELOW THE FALLS.—The ice at Portland moved away yesterday morning, but the river continues gorged below New Albany. The New Albany and Portland ferry-boats have resumed their regular trips again.

The New Albany Ledger says that boatmen are very much alarmed as to the safety of their property upon a final sudden break-up. The wharf-boats of Messrs. Reamer and Pendus and a fleet of coal-boats along the New Albany shore were more or less damaged, and some of them completely wrecked by the movement. The steamers Sheridan, Baltic, Peter Teller, and a little schooner being finished, were also somewhat damaged.

A SLOUCH OF DESPAIR.—Campbell street, between Ballard and Green, has been graded and paved very handsomely, while the square between Ballard and Jefferson remains entirely unimproved, and, at present in as miserable a condition as could well be imagined, reminding one of Bunyan's Slough of Despond. The mud varies in depth from the shoe-top to the knee. Considering that it is a great thoroughfare, it is present condition is a great inconvenience. The city should at once purchase the continuation of the street, and have it properly improved.

COMPLIMENTARY BENEFIT TO MISS DORA SHAW.—The complimentary benefit tendered to Miss Dora Shaw by her numerous admirers in this city, will come off at the Theater Monday evening. We received the correspondence at too late an hour last evening to present it to the reader this morning. The public will be pleased to hear that Miss Shaw has selected those admirable pieces, "Ingraham," and the "Honeymoon," which there is nothing in which her appearance would be hailed with greater enthusiasm.

To Be Continued.—The railroad and steam, both agency so successfully conducted by the late lamented I. S. Moorhead, will be continued as heretofore. The style of the new firm will be I. S. Moorhead, the estimable widow of the deceased agent retaining an interest in the business. The agency of the Baltimore and Ohio Railroad has been officially transferred to the new firm, and the old business of the house will be continued without cessation.

Hilliard, Summers & Co.—The old firm of Brannan & Summers expires by limitation on the 1st of February. A new firm consisting of Isaac H. Hilliard, E. H. Summers, and James Dailes, of New Orleans, and John S. Brannan, of Louisville, under the firm name of Hilliard, Summers & Co., for the purpose of continuing the cotton factorage and commission business is announced in our columns this morning.

LECTURE.—The third lecture before the Young Men's Christian Association will be delivered at Mozart Hall, this evening, at 7½ o'clock by Rev. Lewis W. Green D. D. The most important of the subject "The Immortality of the Soul?" together with the great reputation of the lecturer, should surely call forth a large audience.

Tickets to be had at the door; season tickets \$1; single tickets 25 cents.

CLOSED OUT.—Mr. Nauts informs us that the Louisville and Frankfort Railroad Company have discontinued the wood trade, at least, for the present—having closed out all for which they had engagements. They have sold about \$7,000 worth of wood; and while they have greatly benefited the people, they have not at all impoverished themselves. "Dum vivimus cito."

DEATH'S DOINGS.—Death has been busy in our midst of late, and within a brief period almost every circle has felt the chilling touch of the icy hand. We are grieved to add another name this morning to the list of the departed—of our old friend, James McGeehee. He died yesterday, at the advanced age of eighty-eight.

BRIDGE WASHED AWAY.—We are sorry to learn that the bridge over Beech Fork, on the track of the Louisville and Nashville Railroad, has been swept away by the ice. The structure was not quite complete, although the work had so far progressed as to render the loss a severe one.

NEW CHURCH OPENED.—St. Andrew's Episcopal Church, situated on Chestnut, between Ninth and Tenth streets, will be opened for the first time for Divine service, to-morrow morning, at 11 o'clock. The public are invited to attend. Seats all free.

THE WEATHER.—The ice continued to thaw yesterday, and in the afternoon we had a slight fall of rain. In the evening the rain varied into sleet, which melted after it fell. Last night considerable snow fell, some of which remained upon the ground.

POLICE COURT YESTERDAY.—In the absence of Judge Johnston, Mayor Barbee presided over the Police Court yesterday. There were but two trifling cases on the docket, and the Mayor exhibited his *pro tempore* clemency by dismissing them both.

BEHIND TIME.—The down passenger train over the Louisville and Frankfort Railroad, due at noon yesterday, was delayed in its arrival by some trivial, but unavoidable accident, and nearly two hours—arriving between 1 and 2 o'clock.

GERMAN THEATER.—We understand that a talented company of German performers give a theatrical entertainment at Concert Hall, in Fifth street this evening. Our German friends should encourage the enterprise.

EXPULSION OF A LEGISLATOR.—The House of Representatives of the Ohio Legislature, Thursday afternoon, took final action in the case of John P. Slough, of Cincinnati, expelling him for his conduct upon Cawell.

"A PRIVATE FAMILY, living in a pleasant neighborhood, within a few minutes walk of the Post-office, have a room unoccupied, which they will let, with board. Inquire at this office.

A TALE TOLD OUT OF SCHOOL.—We learn that a disturbance occurred yesterday between some boys in the First-ward school and the janitor, who is richly deserved in a physical encounter.

ANNIVERSARY EXERCISES.—The anniversary of the birth-day of Thomas Paine was celebrated by his admirers, in Cincinnati, at Smith & Nixon's Hall, on Thursday evening.

ELIOT BROTHERS, Wholesale and Retail Cigars, dealers, No. 45 Main street, between Third and Fourth, where you can find the best Cigars, better than any other house, in the West. Give a call at 11 A.M.

M. HANCOCK, Attorney at Law, Louisville.

A. T. MURRAY, attorney at law, near the corner of Sixth and Office on Jefferson.

ONE OF THE SMITH FAMILY IN TROUBLE.—Our police authorities are well aware that the present winter has been a season of peculiar calamity on the part of a certain proscribed class of people. The keeper of a notorious boarding-house in the upper suburbs, Madame Alice Smith, found it necessary recently to seize upon a gold watch and other valuable property of one of her boarders, to secure a board bill which the said Alice held against the delinquent boarder. Having some experience in litigation herself, the exasperated boarder brought suit against her exacting landlady, to compel her to restore the custody of the property to the rightful owner. The suit was brought before our old friend, Esquire Connell, and was duly heard on Thursday last. The splendid equipage of the fair Alice was drawn up at the door of the magistrate, her retinue attended her at the feet of justice, and she retained the weight of the principal legal ability which surrounded that tribunal. Justice Connell, however, was not to be overawed, and his official eyes were blinded to the princely display of the defendant, and his legal arms were deaf to the barking eloquence of her distinguished counsel—for he held her in heavy bonds to restore the property which she had so summarily confiscated.

SIGNORITA BERTINI.—Intending to speak of another person altogether, whose name we put down in our running chronicle, the printer yesterday morning made us represent Signorita Bertini as having been engaged in a professional dance. Of course it was not our intention to speak of the charming vocalist of that name. Aside from a taste in the matter of amusement; the tenets of which prohibit her participation in an entertainment of the kind, even as amateur. She spent the evening referred to in company with a number of female friends in the ladies' parlor at the Louisville Hotel, altogether oblivious to the amusing scene aetempted to describe.

By reference to the card in another column, it will be seen that Signorita Bertini will give one of her much admired variety concerts at the Seventeenth Street Police received information last evening that Charles William Rhinehart, a tailor, living in the tenement house No. 25 Avenue A, and one of his children were lying dead, and that his wife and another child were ill from the effects of poison. Capt. Hart immediately repaired to the house and ascertained from Mrs. Rhinehart that her husband had, in the morning, infused a poison of some description, supposed to be arsenic, in the coffee, of which he partook very freely, and then compelled a child of his, five years of age, who was lying sick with the small-pox, to drink a cupful of it.

It also appeared that the husband had for some time past been very intemperate, and had threatened to destroy himself and family. On Saturday evening he informed his wife that he had something which would put an end to their troubles, but gave no particulars. This excited suspicion in the mind of Mr. Rhinehart, who immediately repaired to the house and ascertained from Mrs. Rhinehart that her husband had, in the morning, infused a poison of some description, supposed to be arsenic, in the coffee, having a peculiar taste, and at first drinking drinking any of it; but seeing his wife was sorely wept in a measure quieted, and she soaked some bread in it, and in this way partook of a small portion. She did the same also in regard to her youngest child.

After the husband had finished his breakfast, he forced the little girl, who was sick, to drink a cupful of the coffee, and after doing so, when his wife was taken ill, he told her that he was not favored with both sleet and snow.

OUR PROPHETY.—Without the least indication of falling weather at the time, we stated Thursday morning, that it would rain on Friday.

Thousands of persons who have been in the habit of consulting in our advice and judgment, immediately scrutinized the weather suspiciously and shook their heads ominously, while others, with less reverence for experience and appreciation of science, openly allowed that we would certainly be wrong for once. But Friday came, and very naturally came along the rain, as we were taken, and the weather was as we predicted.

Provisions plenty, at cheaper rates than any previous winter.

The people of Superior are in excellent spirits on account of the progress being made by the St. Croix and Superior Railroad Company.

—prosperous never very popular in their own congressional district.

SIX THOUSAND FIVE HUNDRED DOLLARS IN HAND.—It is said that Messrs. Tiffany & Co., sold, last week, a single diamond, to be worn in a ring, for \$6,500 cash! It is the central stone for some time past at their establishment.

The lady who wears this ring has a hard word seeking—provided the owner is a lady, and provided also she has a hand to give. One would almost be willing to have his eyes scratched from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West. For instance, at this point, from the measurement of Mr. Owen, the Rendevy mines, one half-mile above Hawesville, are 187 feet above low water, while our mines, below town one mile, are 22 feet below low water, and the intermediate openings from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West. For instance, at this point, from the measurement of Mr. Owen, the Rendevy mines, one half-mile above Hawesville, are 187 feet above low water, while our mines, below town one mile, are 22 feet below low water, and the intermediate openings from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West. For instance, at this point, from the measurement of Mr. Owen, the Rendevy mines, one half-mile above Hawesville, are 187 feet above low water, while our mines, below town one mile, are 22 feet below low water, and the intermediate openings from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West. For instance, at this point, from the measurement of Mr. Owen, the Rendevy mines, one half-mile above Hawesville, are 187 feet above low water, while our mines, below town one mile, are 22 feet below low water, and the intermediate openings from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West. For instance, at this point, from the measurement of Mr. Owen, the Rendevy mines, one half-mile above Hawesville, are 187 feet above low water, while our mines, below town one mile, are 22 feet below low water, and the intermediate openings from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West. For instance, at this point, from the measurement of Mr. Owen, the Rendevy mines, one half-mile above Hawesville, are 187 feet above low water, while our mines, below town one mile, are 22 feet below low water, and the intermediate openings from 75 to 90 feet above the lowest of our openings, which some of our citizens have severely felt in their desire to supply a cheap fuel to the great West.
